

Towhid Alam

Completed 117 labs earning 7530 points.

Activity Report

Date	Lab	Description	Points Earned
2026-03-25	Windows Concepts: Environment Variables	Understand the function of environment variables in Windows	200
2026-03-24	Splunk Basics: Demonstrate Your Skills	Recall the Splunk features and how to use them	200
2026-03-24	Splunk Basics: Dashboards and Visualization	Recognize dashboards and how they can be used	100
2026-03-23	Cyber Kill Chain: Reconnaissance	Recognize the fundamentals of the reconnaissance phase	200
2026-03-17	Splunk Basics: Advanced Searching (SPL & Transforming)	Use Splunk's Search Processing Language (SPL) to search for and transform specific information	200
2026-03-16	Splunk Basics: Search	Identify the key structure of a basic Splunk search	100
2026-03-16	Staying Safe Online: Accidental and Malicious Data Leaks	Recognize the differences between accidental leaks and malicious leaks	10
2026-03-16	Staying Safe Online: Covid-19 Cybercriminals	Identify the characteristics of Covid-19 phishing scams	10
2026-03-16	Staying Safe Online: Identifying Ransomware	Recognize the tell-tale signs of ransomware	10
2026-03-16	Staying Safe Online: Updates and Patches	Identify the differences between updates and patches	10

Activity Report Page 2 of 9

Date	Lab	Description	Points Earned
2026-03-16	Staying Safe Online: Firewalls and VPNs	Recognize the benefits of firewalls and VPNs	10
2026-03-16	Staying Safe Online: Passwords	Recognize how to protect yourself and your devices with strong passwords	10
2026-03-16	Staying Safe Online: Antivirus Software	Identify the purpose of antivirus software and its main features	10
2026-03-16	Staying Safe Online: Mobile Security Tips	Identify potential threats to mobile phone security	10
2026-03-16	Staying Safe Online: Identity Theft	Recognize the ways to prevent identity theft and the warning signs to look out for	10
2026-03-16	Staying Safe Online: Backups	Recognize the importance of backups	10
2026-03-16	Staying Safe Online: Safer Browsing	Recall how to protect yourself and your privacy as you browse the web	10
2026-03-16	Staying Safe Online: Malware	Recognize the most common forms of malware and how they can affect you	10
2026-03-11	Secure Fundamentals: The CIA Triad	Define confidentiality, integrity, and availability	20
2026-03-11	Secure Fundamentals: Attribution and Accountability	Explain attribution and accountability	20
2026-03-11	Secure Fundamentals: Principle of Least Privilege	Describe the principle of least privilege	10
2026-03-11	Secure Fundamentals: Defense In Depth	Describe the security concept of defense in depth	10
2026-03-11	Secure Fundamentals: Security Patching	Describe what a security patch is	10
2026-03-11	Secure Fundamentals: Authorization	Describe the concept of authorization	10
2026-03-11	Secure Fundamentals: Authentication	Describe the concept of authentication	10

Activity Report Page 3 of 9

Date	Lab	Description	Points Earned
2026-03-11	Incident Response in the Workplace	Recall the advantages of an incident response plan	10
2026-03-11	Guidance on Remote Working	Identify the risks associated with remote working	10
2026-03-11	Security On The Go	Recognize the security risks of using devices when away from the office	10
2026-03-11	Packet Analysis: TLS Handshake	Revise information on the TLS Handshake	100
2026-03-11	Personal Devices in the Workplace	Recognize the risks associated with using personal devices in the workplace	10
2026-03-11	The Importance of Information Security and Cybersecurity	Describe a simulated example of a breach and recall its emotional impact	10
2026-03-11	Privileged Access	Recall what privileged access is and why it's an attractive target for attackers	10
2026-03-11	Physical Security	Identify common physical security risks	10
2026-03-11	Privacy	Identify what privacy is and why it needs protecting	10
2026-03-11	Staying Safe Online: Consequences and Impacts of Cyberattacks	Define what a cyberattack is	10
2026-03-11	Staying Safe Online: Why Information Security is Everyone's Business	Recognize the importance of information security	10
2026-03-11	What Is Information Security?	Identify the workplace and personal security challenges that good information security practices help to solve	10
2026-03-11	History of Information Security	Recall some of the key moments for information security throughout history	10
2026-03-11	Disposal of Device Information	Recognize why secure device disposal is core to an organization's information management process	10
2026-03-11	Information Security and Cybersecurity Terminology	Recall some key information security and cybersecurity terms and phrases	10

Activity Report Page 4 of 9

Date	Lab	Description	Points Earned
2026-03-11	Information Security: Starting at the Beginning	Recall the difference between information security and cybersecurity	10
2026-03-11	Wireshark: Demonstrate Your Skills	Identify relevant network traffic using Wireshark	300
2026-03-11	Social Engineering	Describe different social engineering attack techniques and their impacts	10
2026-03-11	Staying Safe Online: Phishing Emails	Recognize the main characteristics of phishing emails	10
2026-03-11	Shoulder Surfing	Recognize how shoulder surfing works and the various ways it can be employed	10
2026-03-10	Packet Analysis: BPF Syntax	Analyze network packet captures	100
2026-03-10	Wireshark: TLS Traffic	Analyze network packet captures	300
2026-03-10	Packet Analysis: Packet Capture Basics	Analyze network packet captures	100
2026-03-04	Web Log Analysis: What are Web Server Logs?	Recall the different types of web server logs	20
2026-03-04	Splunk Basics: Data Sources	Be able to recall the various data sources supported by Splunk	40
2026-03-04	Splunk Basics: The Splunk Interface	Recognize the different components of the Splunk Interface	40
2026-03-04	What is Splunk?	Recall what the Splunk tool is	40
2026-03-04	Wireshark: Metrics and Statistics	Analyze network packet captures using Wireshark statistics	100
2026-03-04	Packet Analysis: Using tcpdump	Analyze network packet captures	200
2026-03-04	Wireshark: Stream/Object Extraction	Analyze network packet captures	200

Activity Report Page 5 of 9

Date	Lab	Description	Points Earned
2026-03-03	Wireshark: Display Filters – Combining Filters	Analyze network packet captures using multiple operators	200
2026-03-03	Wireshark: Display Filters – Diving In	Analyze network packet captures using complex operators	200
2026-03-03	Cyber 101: Rogue USB Devices	Recall how rogue USB devices can be used for malicious purposes	10
2026-03-03	Cyber 101: Information Security	Recognize the importance of information security for individuals and organizations	10
2026-03-03	Cyber 101: Who Are The Hackers?	Recognize the different types of hackers	10
2026-03-03	Cyber 101: Why Hackers Hack	Recognize some of the methods used by hackers	10
2026-03-03	Cyber 101: Virtual Card Numbers	Identify the different types of virtual card numbers	10
2026-03-03	Cyber 101: Fake News	Recognize the characteristics of fake news	10
2026-03-03	Cyber 101: Security Champions	Explain what a security champion is and their purpose	10
2026-03-03	Cyber 101: Keylogging	Recognize what keyloggers are	10
2026-03-03	Cyber 101: Geolocation	Recognize the differences between device-based and server-based geolocation tracking	10
2026-03-03	Cyber 101: Cookies	Recognize how cookies are used by organizations	20
2026-03-03	Wireshark: Display Filters – Introduction to Filters	Analyze network packet captures	100
2026-03-03	Wireshark: Introduction to Wireshark	Analyze network packet captures	100
2026-03-03	Cyber 101: Cyber Kill Chain	Recognize the purpose of the cyber kill chain	10

Activity Report Page 6 of 9

Date	Lab	Description	Points Earned
2026-02-24	Web Log Analysis: The Tomcat's Out Of The Bag	Identify evidence of a compromise in web server logs	300
2026-02-24	Discovery: Browser Bookmarks	Identify enumeration techniques by analyzing browser bookmark files	100
2026-02-24	Incident Response: Data Exfiltration	Practice identifying instances where data has been exfiltrated	100
2026-02-24	Cyber 101: Darknets	Recognize how darknets operate on the internet	10
2026-02-24	Windows Concepts: Alternate Data Streams	Exposure to ADS and data hiding	200
2026-02-24	Windows Concepts: Security Policies	Exposure to Windows policy mechanisms	200
2026-02-18	Windows Concepts: New Technology File System (NTFS)	Analyze Windows file permissions	100
2026-02-14	Web Log Analysis: Access Logs	Recognize web server access logs	100
2026-02-14	Staying Safe Online: Multi-Factor Authentication	Recall how multi-factor authentication works	10
2026-02-12	Introduction to Hashing	Identify the characteristics of a good hashing algorithm	100
2026-02-12	Encryption Tools: CyberChef	Recall how CyberChef functions	40
2026-02-11	Data Privacy: What About You?	Outline why data privacy is important	20
2026-02-11	Data Privacy: Data Privacy Regulations	Summarize what data privacy regulations are	20
2026-02-11	Data Privacy: Key Concepts	Explain the key concepts of data privacy	10
2026-02-11	Tactics: Reconnaissance	Recognize the purpose of the MITRE ATT&CK® Reconnaissance tactic	20

Activity Report Page 7 of 9

Date	Lab	Description	Points Earned
2026-02-11	Introduction to MITRE ATT&CK®	Be familiar with the MITRE ATT&CK® framework and know how it's used	20
2026-02-03	NIST 800-53: Security and Privacy Controls for Information Systems and Organizations	Familiarize yourself with NIST 800-53 and its purpose	20
2026-02-03	Ethics & Laws: US Federal Cyber Law	Identify the main US federal laws that can be used to convict cyber criminals	10
2026-02-03	Ethics & Laws: UK Cyber Law	Demonstrate an understanding of illegalities and breaches of law	40
2026-02-03	Ethics & Laws: Bugbusters	Describe bug bounty programs	40
2026-02-03	Ethics & Laws: Ethical and Unethical Hacking	Demonstrate the ability to determine the ethical choices of hackers	40
2026-02-03	Ethics & Laws: Burglary and Hacking	Demonstrate an understanding of how hacking can be similar to burglary	40
2026-02-03	Ethics & Laws: Police Raid	Demonstrate an understanding of devices that would be confiscated in an investigation	40
2026-01-28	Introduction to Networking: Demonstrate Your Knowledge	Demonstrate an understanding of networking technology fundamentals	40
2026-01-28	Linux CLI: Demonstrate Your Skills	Demonstrate your understanding of the Linux CLI	100
2026-01-28	Linux CLI: Using Find	Recognize how the find command work	200
2026-01-28	Linux CLI: Using Sudo	Identify different user privileges in Linux	100
2026-01-28	Linux CLI: Using Screen	Describe how `screen` works in the CLI	100
2026-01-28	Linux CLI: Searching and Sorting	Employ searching techniques to find patterns in files	100
2026-01-28	Linux CLI: Combining Commands	Identify the different ways of combining commands on the terminal	200

Activity Report Page 8 of 9

Date	Lab	Description	Points Earned
2026-01-28	Introduction to Networking: Domain Name System	Summarize the fundamentals of the Domain Name System	40
2026-01-28	Linux CLI: Stream Redirection	Describe how data can be manipulated via the terminal	100
2026-01-28	Linux CLI: Generating File Hashes	Recognize file hashes	100
2026-01-28	Linux CLI: Using SSH and SCP	Recall what the SSH protocol is	100
2026-01-27	Linux CLI: Manipulating Text	Modify text within files using basic command line tools	200
2026-01-27	Linux CLI: Editing Files	Be able to recall some common Linux command line text editors	100
2026-01-27	Linux CLI: Using wc	Count elements in a file using the wc tool	200
2026-01-26	Linux CLI: File Permissions	Read Linux file permissions	100
2026-01-21	Introduction to Networking: Network Topologies	Recognize network topologies	40
2026-01-21	Introduction to Networking: Network Hardware	Recognize the different types of hardware used for networks	40
2026-01-21	Introduction to Networking: Types of Networks	Recall multiple types of networks and how they differ	20
2026-01-21	Introduction to Networking: What is a Network?	Recognize networks and their components	40
2026-01-21	Linux CLI: Introduction to the Linux Command Line Interface	Recall Linux command line fundamentals	40
2026-01-21	Introduction to Networking: IP Addresses	Recognize an IP address	40
2026-01-21	Linux CLI: Getting Started with the Terminal	Recall fundamental concepts of the Linux terminal	100

Activity Report Page 9 of 9

Date	Lab	Description	Points Earned
2026-01-21	Linux CLI: Changing Things	Recall the Linux CLI commands explored in the lab	100
2026-01-21	Linux CLI: Moving Around	Navigate through directories on the command line	100

About Immersive

Immersive is the world's first fully interactive, on-demand, and gamified cyber skills platform. Our technology delivers challenge-based assessments and upskilling exercises which are developed by cyber experts with access to the latest threat intelligence. Our unique approach engages users of every level, so all employees can be equipped with critical skills and practical experience in real time.
